Central Bank

MERCHANT SERVICES

POINT OF SALE SOFTWARE SOLUTIONS

For any merchant using point of sale payment applications, Central Bank can support many payment applications with our network, TSYS Acquiring Solutions. Your point of sale reseller and integrator can help you with compatibility questions, or you can call us to verify if your software choice is compatible. The product must be registered as PCI-DSS compliant.

Beginning January 2017, the reseller and integrator must be certified and on the Qualified Integrator and Reseller (QIR) vendor list, as required to be PCI-DSS compliant for Visa rules and regulations.
